

MOTION SENSORS

Motion Sensors are perfect for Point of Sale displays. A Motion Sensor with an audible message will help you to raise attention and create impact.

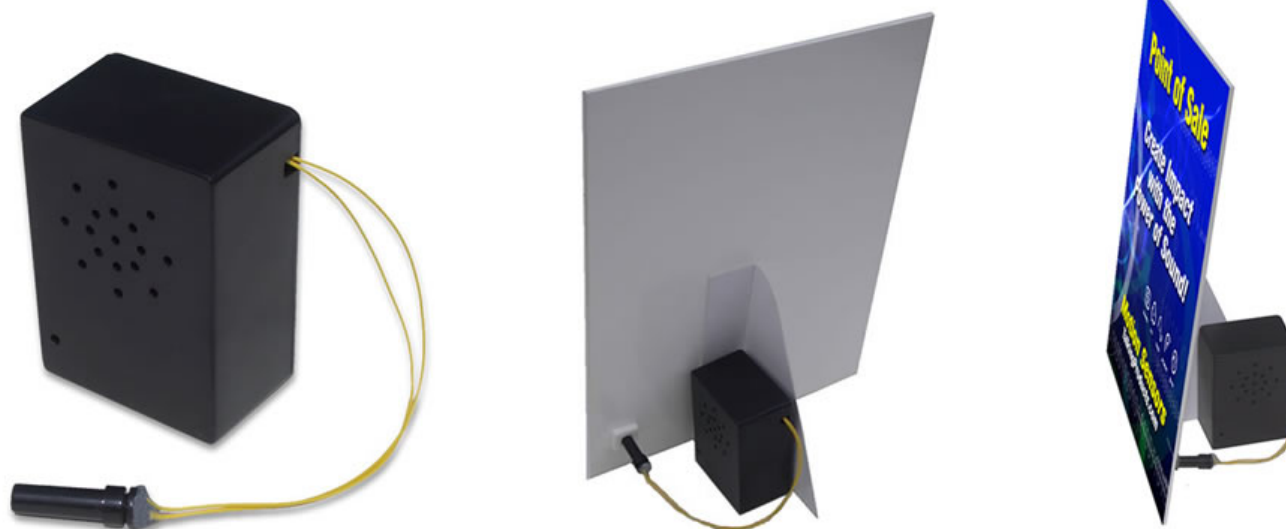

Choose any voice message or sound effect up to 30 seconds long. We can produce a Motion Sensor that will play your chosen sound automatically as someone walks past your display.

You can send us a sound file that you have created yourself or we can produce one especially for you.

The sound module is housed in a Black plastic box, approx. 82 x 60 x 37mm.

This unit is also available with an external sensor to offer more flexibility for use with Point of Sale displays. The Motion Sensor range is set to approx. 1.5m to ensure efficient activation in a shop aisle.

The unit is powered by three replaceable AA batteries, which will ensure the sound message will play at least 8,000 times.
