

GREETING CARD SOUND MODULE

Choose any voice message or sound effect up to 30 seconds long. We can pre-record your chosen sound onto each of the electronic modules.

The module includes a sliding activator switch, so when it's used inside a Greeting Card, the chosen sound will play automatically as the card is opened.

The module size is approx. 70mm x 65mm and mounted on a self adhesive label for quick assembly.

Please call us for a quotation.
